

# Pepper's Ghost

Create your own Victorian theatre ghost illusion

## You Will Need:

- A shoebox
- CD Case
- Scissors
- Black paper or paint
- Bright torch
- Figure for actor (owl)
- Figure for ghost (deer)
- Protractor

1. Paint the inside of your box to make it black (or cover with black paper)

2. Cut two windows in the box. You may need an adult to help you. Put one window on the front left of your box and another on the front right of the lid.

3. Place the actor (owl), ghost figure (blue reindeer) and CD case in the box as shown in the photo. The CD case should be at a 45 degrees (use a protractor to check).

4. Close the lid and make sure you can see your actor through the open door. Shine the torch down through the door in the lid on to the 'ghost'.

5. As you (or your assistant) shines the torch light, look through the other window and see the ghost appear behind your actor!
